

CYPRESS ST FRANCIS

PET OWNER:	ST FRANCIS	ST FRANCIS ANIMAL PROTECTION SOCIETY	ACCESSION #	7200466519	
PATIENT ID:		540 MANZANA PL	REQUISITION #:	6	
SPECIES:	FELINE	SAN JOSE, CALIFORNIA 95112	DATE OF COLLECTION:	11/04/2019	
BREED:		415-990-3580	DATE OF RECEIPT:	11/04/2019	
GENDER:	FEMALE SPAYED	ACCOUNT #:	29252	DATE OF REPORT:	11/05/2019
AGE:	6M1D	ORDERED BY:	SHIRA A RUBIN		
MICROCHIP #:					

IDEXX SERVICES: 9999 SAMPLE/TEST INFO NEEDED, 24 FELV AG + FIV AB ELISA

SEROLOGY

TEST	RESULT	UNITS
FelV Antigen by ELISA	NEGATIVE	
FIV Antibody by ELISA ^a	POSITIVE	

OTHER

More Information Needed

Extra Lavender Top Tube received. It will be held for 6 days from the date of receipt. Please call Reference Laboratory Customer Support at 1-888-433-9987 if additional testing (PCR, CBC, etc.) is needed within this time frame. Note that due to stability, most hematology tests can only be added on up to 72 hours from time of collection.

NOTES

SEROLOGY

- a The American Academy of Feline Practitioners highly recommends confirming FIV ELISA positive results. Consider an alternate serologic method such as the FIV Antibody by Western Blot (test code 896) or a Feline Triple SNAP test (test code 3755 or performed in house). Maternal antibody may be present in uninfected kittens younger than 6 months of age. Cats vaccinated with the FIV vaccine may test positive on any serologic test as early as 28 days post-vaccination and stay positive for at least 1 year. In serologically positive cats that have been vaccinated or have an unknown vaccination history, an FIV RealPCR Test (test code 2866) should be considered to help identify FIV-infected cats.
